

PYTHON DEVELOPER

At Rad company, we are looking for a savvy Python Developer to join our growing Data infrastructure team. This is a full-time permanent position.

CORE RESPONSIBILITIES:

The role will involve crawling, raw data parsing, creating storage and retrieval APIs.

KEY SKILLS:

- Good problem-solving skills.
- The person must be proactive and self-motivated supporting the data needs of multiple teams, systems, and products.
- Write efficient, easy-to-maintain code of high quality.
- Solid development skills in Python and crawling at scale.
- Good knowledge of algorithms and data structures, including OOP, design patterns, and caching mechanisms.
- Experience with Flask and FastAPI or Sanic frameworks.
- Source code management using Git
- Experience with Celery, Scrappy, RabbitMQ
- Relational SQL, NoSQL, and in-memory databases, including Postgres, MongoDB, and Redis.

Seniority Level: Mid Emp

Industry Experience: +3 years
